

## ADHD Screening

### Nine core symptoms:

Symptom	None	Mild	Moderate	Severe
1. Get distracted easily by extraneous stimuli or irrelevant thoughts.				
2. Make decisions impulsively.				
3. Have difficulty stopping activities.				
4. Start a project without reading or listening to directions.				
5. Fail to follow through on commitments to others.				
6. Have trouble doing things in their proper order.				
7. Have a complicated driving record.				
8. Have difficulty sustaining attention in tasks for fun stuff.				
9. Have difficulty organizing tasks or activities.				

Screening tools:

- ADHD Self Report Scale (ASRS-v1.1) @ <http://bit.ly/XiMEPM>.
